BITZER Impurity Machine

Central control panel incl.
legal for trade sample weighing

Benefits:

- Time saving by aspiration, sieving and calibratable weighing in one process
- Automatic determination of clean grain, small seeds and impurities
- Comfortable dust protection and sound insulation
- Cost savings are possible by using existing sample cleaners (SLN3)
- Modular system: Expandable to the BITZER Automatic Sample Analyser for a complete automation of the determination of all relevant grain qualities, incl. integration of (existing) grain analysers
- <u>Optional:</u>

  Documentation through installation of label printers

  Aspiration cover for improved dust and sound protection

  Sieve depot for easy access to the different sieves
